

## User Interface and Navigation

### What is our GOAL for this MODULE?

The goal of this module is to revise our learning in creating the react native app and build the user interface for our app.

### What did we ACHIEVE in the class TODAY?

- Worked on the user story and wireframe.
- Built the User Interface for the app.

### Which CONCEPTS/CODING BLOCKS did we cover today?

- Building the User Interface

### How did we DO the activities?

We identify the user interface elements in the app.

We used the React Native components to create the static screens for the app.

We added navigation for the different screens in the app

### What's NEXT?

In the next class, we will add database to our project.
