Database

What is our GOAL for this MODULE?
The goal of this module is to revise our learning in creating the react native app and add a database to our app.

What did we ACHIEVE in the class TODAY?
- Built the User Interface for the app.
- Added database to our app.

Which CONCEPTS/CODING BLOCKS did we cover today?
- Adding the firebase database to our app.

How did we DO the activities?
We installed the firebase library to our project.

We thought and worked on the database structure for the app.

We created and connected the database to our app.

What's NEXT?
In the next class, we will add the functionality for app..
